

Privacy Policy

Introduction

The Brotherhood is a collaborative infrastructure project focused on capability mapping, assessment, and federated coordination systems. It is designed to minimise personal data collection while preserving functionality. This platform is an instance of The Brotherhood Project and this Privacy Policy explains what information we collect, how we use it, and what rights users have regarding their data. By using the platform, you agree to the practices described in this policy.

For Visitors

You may browse the public portions of this website without creating an account. We do not intentionally collect personal information from visitors to the public pages. We do not use visitor information for advertising, behavioral profiling, or sale to third parties.

Your browser may automatically provide limited technical information necessary to display the website correctly, such as screen size, browser capabilities, language preferences, and other compatibility-related information. This information may be used to improve performance, accessibility, and the user experience.

Additionally, our hosting provider and infrastructure services may automatically process standard server information, such as IP addresses, browser type, and access logs, for security, maintenance, and operational purposes.

If you are simply visiting, this is all that applies to you. If you choose to create an account, the information described in the following sections of this Privacy Policy will apply.

Information We Collect

We may collect:

1. Account information like username
2. Strictly optional personal information like email address, location, or date of birth
3. Authentication credentials for security
4. Graph data created and/or stored by user on our servers
5. Graph related data like assessments and capabilities submitted by user
6. Data stored locally in your browser for application functionality
7. Limited technical logs and diagnostics necessary to maintain security, troubleshoot issues, and operate the service

We do NOT intentionally collect sensitive personal information such as biometric data, government IDs, medical records, or financial account information.

We use this collected information primarily to:

1. Provide and maintain the platform
2. Authenticate users
3. Store and synchronise workspaces
4. Prevent abuse and unauthorised access

5. Enable successful communication between users
6. Enable collaborative features of the platform like graph editing and assessments

We do NOT sell user data or use personal information for advertising profiling.

Local Storage and Cookies

The platform may use browser local storage and essential authentication mechanisms to:

1. Keep users logged in
2. Save workspace state
3. Improve application functionality

These technologies are used only for core functionality and NOT for advertising or cross-site tracking. Personal information (except site-specific username and UUID) is NEVER stored in local storage or cookies.

Third Party Services

The platform uses third-party infrastructure providers, like:

1. Render for hosting
2. Supabase for database
3. OpenRouter as optional AI/API provider

Data sent through third-party providers is subject to their respective policies. The list of third-party services may grow in the future.

AI Data Policy

The platform does not host AI support natively. It has an optional API service for workspace automation. The data sent via this API are strictly:

1. The prompt user submits
2. Any graph data user selects (default may send complete graph)

The user may choose specifically what data to share, or not use the feature completely.

Data Retention

We retain account and workspace data for as long as necessary to operate the platform unless deletion is requested. Some historical graph or contribution records may remain in anonymized or versioned form to preserve system integrity and auditability. The graphs may also be copied and preserved by other users.

User Rights

Through the platform users can:

1. Change their profile information at any time
2. Export any graph data made and stored by any user on the website
3. Delete their account and personal information (any graph made by the user is not treated as personal information)
4. Deletion of graph-related information like assessment and capability, which are related to them

Moreover users may explicitly request:

1. Access to their stored data
2. Export of their workspace data
3. Deletion of their account
4. Correction of inaccurate information

Requests can be made by contacting the.brotherhood.contacts@gmail.com

Security

We take reasonable measures to protect user data, including authentication controls and encrypted connections where applicable. However, no system can guarantee absolute security. In the event of a data breach affecting user personal data, we will notify affected users and relevant authorities as required by applicable law.

Children's Privacy

The platform is not intended for users under the age of 18. We do not knowingly collect personal data from minors. If we become aware that a minor's data has been collected, it will be deleted upon request or discovery.

Changes to this policy

This Privacy Policy may be updated over time. Users will be notified of every change via the website itself. Continued use of the platform after changes constitutes acceptance of the revised policy.

Legal

This is an instance of The Brotherhood Project and is currently operated by XXXXX. The platform operates under Indian law and is intended to comply with the Digital Personal Data Protection Act, 2023.
